**NOTE:** Download all your support materials and tools in one place.

- 1. Go to: http://www.digital-watchdog.com/support-download/.
- 2. Search your product by entering the part number in the '**Search by Product**' search bar. Results for applicable part numbers will populate automatically based on the part number you enter.
- 3. Click '**Search**'. All supported materials, including manuals, Quick start guides (QSG), software and firmware will appear in the results.

Attention: This document is intended to serve as a quick reference for initial setup. See the DW Spectrum<sup>®</sup> full manual for more information on features and functionality.

## SETTING UP THE SERVER

#### **STEP 1:** Connect external devices, power and network.

- Connect a monitor, USB keyboard, mouse, and network cable to Ethernet port B13 (1G LAN) on the rear panel diagram. Configure the camera network first, then the server's local network.
  - NOTE See page 2 for detailed back panel breakdown for each model.
- 2. Connect the server to an appropriate power source. A UPS system (600VA or higher) is recommended.
- Connecting the power cable to a live power source should turn on the server automatically. If not, press the power button on the front panel (F1 on the front panel diagram).

#### **STEP 2:** Configure date and time

- 1. Double-click on the **Date and Time** icon on the desktop.
- 2. The default time zone is UTC-08:00 Pacific Time. Click **Change time zone...** to change to the correct time zone.

😭 Time Zone Settings	×
Set the time zone:	
Time zone:	
(UTC-08:00) Pacific Time (US & Canada)	~
(UTC-08:00) Pacific Time (US & Canada) (UTC-07:00) Arizona (UTC-07:00) Chihuahua, La Paz, Mazatlan (UTC-07:00) Chihuahua, La Paz, Mazatlan (UTC-06:00) Central Armerica (UTC-06:00) Central Armerica (UTC-06:00) Caster Island (UTC-06:00) Guadalajara, Mexico City, Monterrey (UTC-06:00) Saskatchewan (UTC-05:00) Bogota, Lima, Quito, Rio Branco (UTC-05:00) Chetumal (UTC-05:00) Estern Time (US & Canada)	^

- 3. Click **OK** after selecting the correct time zone.
- Click Change date and time... to update the date and time if they are incorrect. Change date and time...
   NOTE: Verify the time zone before updating the date and time. Time may show 2 or 3 hours off due to an incorrect time zone.

		м	ay 20	18		•	A
9 6 3 0 7 3	30 7 14 21 28 4	1 8 15 22 29 5	We 2 9 16 23 30 6	3 10 17 24	4 11 18 25 1 8	5 12 19	11: 16: 32 AM +

5. Press **OK** after adjusting to the correct date and/or time. Press **OK** to close the date and time when done.

#### STEP 3: Configure network

Please have the following information ready before starting the network configuration.

	Camera network	Local network (LAN)
IP address		
Subnet mask / Netmask		
Default gateway / Gateway	N/A	
DNS servers	N/A	

\* Camera network and local network cannot be on the same network.

**NOTE** The Blackjack server's network settings are set to DHCP by default.

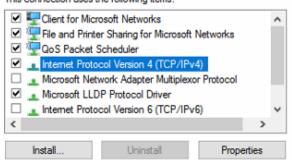

NOTE If you are not sure what information to enter, contact your Network Administrator or Internet Service Provider.

- 1. Double-click on **Network Connections** on the desktop.
- 2. Right-click Ethernet (connected) and click Properties.

3. Select Internet Protocol Version 4 (TCP/IPv4) and click Properties.

This connection uses the following items:

- 4. Click the Use the following IP address: radio button Use the following DNS server addresses: will be selected automatically.
- 5. Enter the IP address, subnet mask, and preferred and alternate DNS server addresses for the local network.
- 6. Click **OK** to close the window, and again for the properties window.

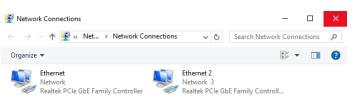

**NOTE** It must be the same network as the cameras and must not be the same network as the local network. Contact your network administrator for more information.

#### Local Network

- 7. Right-click on the Ethernet (Network cable unplugged) and click Properties.
- 8. Select Internet Protocol Version 4 (TCP/IPv4) and click Properties.

This connection uses the following items:	
Client for Microsoft Networks	^
🗹 🏪 File and Printer Sharing for Microsoft Networks	
🗹 🐙 QoS Packet Scheduler	
Internet Protocol Version 4 (TCP/IPv4)	
Microsoft Network Adapter Multiplexor Protocol	
Microsoft LLDP Protocol Driver	
Internet Protocol Version 6 (TCP/IPv6)	~
<	>
Install Uninstall Propertie	s

- 9. Click the Use the following IP address: radio button Use the following DNS server addresses: will be selected automatically.
- 10. Enter the IP address and subnet mask of the camera network. Leave the default gateway and preferred and alternate DNS server fields blank.
- 11. Click **OK** to close the window, and again for the properties window.
- 12. Connect a network cable to Ethernet port B14 (2.5G LAN) on the rear panel diagram to activate the local network connection.
- 13. Close the network connections window.

**NOTE** If you are not connecting to the Blackjack<sup>\*</sup> from the same network, you may be required to perform port forwarding on your router to access the server. Contact your Network Administrator or Installer for additional information

### CONFIGURE CAMERAS USING DW IP FINDER

Refer to the camera's QSG to configure any DW IP camera's IP address using DW IP finder.

### SETTING UP THE DW SPECTRUM MEDIA SERVER

Login: **admin** Password: **admin12345** 

#### STEP 1: Login from the Blackjack' server

- 1. Open the DW Spectrum client. Spect
- 2. Click on the pre-configured server.
- 3. If it does not log in automatically, enter the default password and click Connect.

\* Click **All** to apply the recording settings to the entire schedule.

6. Click **OK** when the necessary recording schedule is set. A red circle will appear next to the camera in the resource list.

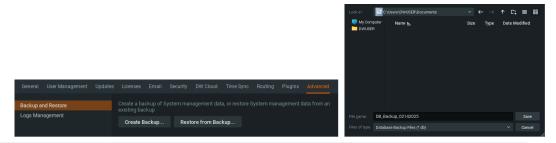

**NOTE:** A Recording License is required to allow a camera to record to the archive.

#### STEP 6: Backup database

- 1. Click the main menu icon in the upper-left corner of the DW Spectrum window, and click System Administration...
- 2. Click the Advanced tab. Click Create Backup...
- 3. Select the location to save the database, and enter a name for the backup file. Click **Save**.

\* Creating a database backup to external storage before and after every update is strongly recommended.

NOTE: More information and instructions are available in the DW Spectrum user manual.

## SETTING UP THE DW AI SERVER CONFIGURATION TOOL

While some camera settings can be configured through the DW Spectrum Client, the DW Ai Server Configuration Tool can be used to provide a complete analytic user experience during the configuration process of the DW Ai Server.

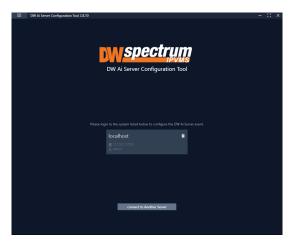

#### **STEP 1:** Logging in with the DW Ai Server Configuration Tool

To begin setting up the DW Ai Server Configuration Tool

 Launch the DW Ai Server Configuration Tool. There is an application shortcut on the desktop. Select the DW Ai Server you want to connect with and log in with the local 'admin' user profile.

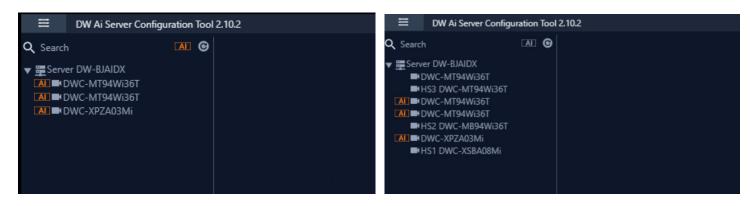

**NOTE:** If connecting the DW Ai Server Configuration Tool to the DW Spectrum Server is hindered by the message "Unauthorized. Please check the access credentials and try again," after changing the user password, enable the Digest Authentication setting of the user profile in the DW Spectrum Client.

2. Once logged in and connected to the DW Ai Server through the DW Ai Server Configuration Tool, a list will show all added cameras in the left-side panel.

To view all cameras, including the cameras without DW Ai server plugin enabled, click "Ai" to view all cameras.

- Search: This search box can be used to filter the camera list based on the entered device name.
- Ai (toggle): The Ai button toggles the camera list between showing all cameras on the DW Spectrum System or just the cameras that have the plug-in enabled. This toggle appears at the top of the camera list beside the search bar. While enabled, the toggle will appear in orange.
- Refresh: This button refreshes the list of cameras from DW Spectrum when it is clicked.
- Device List: A list of DW MEGApix Ai and standard IP devices are listed in the Resource Tree organized by server. While the DWAi toggle is active, only Ai devices will be listed.

Select the Main Menu to display the menu options:

- Disconnect Server: Disconnects the current session with your DW Spectrum Server.
- DW Ai Server List: Displays a list of the DW Ai Server(s) that your DW Spectrum system is configured to use.
- Licenses: Displays a list of the licenses available from the DW Ai Servers.
- Preference: Displays a list of the DW Ai Server Configuration Tool's advanced options.

#### STEP 2: DW Ai Server Licenses

A license is required to use the analytic features of a DW Ai Server. Licenses can be managed through the DW Ai Server Configuration Tool program.

Select "Licenses" from the Main Menu in the DW Ai Server Configuration Tool to view the licenses.

#### Active Licenses

The Active Licenses list shows all licenses of the DW Ai Server and how the licenses are currently allocated.

Server			Total Channels	License Key	
		Channels	Channels	License key	
Server #1	DW AI Server			0G09-5409-06PX	

#### New Licenses

In the New Licenses area of the menu, server tabs (Server #) are created for each DW Ai Server. Select a server tab to view the license activation interface.

• Type Specifies the activation method that will be used for your license activation request.

o Internet Activation: Select to enter the license activation key to add additional DW Ai licenses.

• License Key: Enter the alphanumeric DW Ai license key, then click "Activate" to add a license. An Internet connection is needed for the DW Ai Server to use this feature.

New License	es	
Server #1		
Туре	Internet Activation     O Manaual Activation	
License Key	A1B2-C3D4-E5F6 Activate	=
	Close	

- o **Manual Activation:** Select to copy the server's HW GUID and manually add a DW Ai license. This option is intended for use if the DW Ai Server does not have access to the Internet.
  - **HWGUID:** This is the system's unique code. Copy the HWGUID and submit a request for a manual activation code to <u>licenses@digital-watchdog.com</u>. The email should include the server's HWGUID and the license key that you are trying to activate.
  - Copy to clipboard: Copies the HWGUID to the clipboard.
  - License Key: Type or paste the activation code into the space provided, then click "Activate."

New License	<u>'S</u>
Server #1	
Туре	O Internet Activation ( Manaual Activation
HWGUID	667662F3AAD8EB02E92AA5FE705D42B872614C3DFF5F63B2466607EB484CC883
License Key	Activate
	Close

#### STEP 3: Enable Tab - DW Ai Server Plugin

To set up analytics on the DW Ai Server, select a camera from the left-side panel. The Enable tab shows the status of the plug-in for the selected camera. From here, you can check your license status and select the preferred deep-learning feature.

- DW Ai Server Plugin: Toggle to enable/disable the plug-in for the selected camera.
- **Tracker Engine:** Defines the tracking engine that will be used for analytics. The tracker engine will need to 'learn the scene' to determine the background from moving foreground objects. While initially learning the scene, a message will be displayed in the live view, and no objects will be tracked during this time.
  - o **DL Object Tracker:** When selected, the analytic engine will use the GPU to detect, categorize and track objects as they move through the camera's detection areas.
- When set to use Object Tracker, the objects can be classified using either deep learning models or by using properties extracted from an object in a calibrated scene. If the Deep Learning Filter is not used, camera calibration is required to detect the object class.
  - o **DL People Tracker:** When selected, the tracker uses the GPU to detect and track people as they move through the camera's detection areas.
- Apply: Apply changes to the selected camera.

## **TROUBLESHOOTING TIPS**

Problem	Possible solutions
A camera or other device is not automatically discovered.	<ol> <li>The device must be on the same local network as the media server.</li> <li>The device must be compatible with DW Spectrum. Refer to the full list of supported cameras on digital-watchdog.com</li> <li>Update the device with the latest firmware.</li> <li>Ensure ONVIF is enabled on the device.</li> <li>Add the camera manually.</li> <li>Reboot the server after installation. Allow up to 2 minutes for the server to detect all supported devices.</li> </ol>
Slow video	<ol> <li>The same camera(s) could be accessed by multiple clients simultaneously.</li> <li>Check network speed.</li> </ol>
Device appears disconnected	<ol> <li>Ensure the username and password are correct in device settings.</li> <li>Click the ping button in device settings to ensure the camera is connected to the network.</li> <li>Reboot or restore the device to the factory default if its web page is available.</li> <li>Update the device with the latest firmware.</li> <li>The device must be on the same local network as the media server.</li> <li>Ensure ONVIF is enabled on the device.</li> <li>The user may not have the necessary permissions to view that device.</li> </ol>
Cannot view archived video	<ol> <li>Ensure there is an active network connection between the client and server.</li> <li>The user may not have the necessary permissions to view archive from that device.</li> <li>The camera may be set to a recording mode that did not record video for the selected time and environment.</li> <li>Check the log on the media server to ensure the device did not unexpectedly disconnect.</li> </ol>
"Unauthorized" message on device	<ol> <li>Ensure the username and password are correct in the device's settings.</li> <li>Reboot the camera.</li> </ol>
